

MEJATC GRANT OVERVIEW (Apprentice Training)

What The Grant **Will Not** Do for Apprentice Training:

- Will not pay for the purchase of apprentice related training book sets.
- Will not offset the cost of attending training in Helena.
- Will not allow for spending on “mortar and bricks” construction.

What The Grant **Will** Do:

- Will provide new opportunities for training in renewable energies, energy efficiency, power quality, advanced control systems, more efficient lighting, etc.
- Will provide for craft certification.
- Will reduce the cost of books by providing a resource library.
- Will purchase labs for training on solar, micro-hydro generation, wind power, building automation, lighting design, power quality, FLIR imaging.
- Will allow for more in-depth training and the possibility of subject-matter experts as guest trainers.
- Will allow the JATC to purchase (and use for training) a wind generator and solar array at the training center in Helena, computers, PLC trainers, craft certification labs, power quality meters, FLIR (heat) imaging equipment, etc.
- Through partnerships, welding facilities and a wind generator tower will be available for use by those associated with the MEJATC. Both apprentices and journey-level electricians will be able to certify for rescue and work on wind farms.
